GlobalWebIndex’s quarterly report on the latest trends in social networking
Introduction

GWI Social is where GlobalWebIndex presents the very latest figures for social networking behaviors and engagement levels across 34 global markets.

Drawing on data from our most recent wave of research, we offer insights on:

- Overall engagement with social media
- Daily time devoted to social networking
- Multi-networking and cross-device behaviors
- The most popular and fastest growing networks globally
- Messaging apps and services
- The potential of social commerce
- Top actions on Facebook, Twitter and Snapchat

In this summary version, we present some of the key figures and headlines.

PRO Platform

All of the questions and data-points featured in this report are available to explore on PRO Platform. They can be analyzed by any audience, date range or selection of countries/regions, with users able to build bespoke audiences based on our wide range of demographic, attitudinal and behavioral variables.

Each chart in this report is accompanied by a hyperlink which will take you to the appropriate section on PRO Platform; simply click on the relevant link to start exploring the data further.

Reports

Each year, GWI interviews over 200,000 internet users across 34 markets – making it the largest on-going study into the digital consumer instigated to date.

Research is conducted in quarterly waves, each of which has a global sample size of around 50,000 internet users. Typically, we interview between 3,000 and 8,000 people per year per market, with larger sample sizes in key countries such as the UK and the US (30,000 each). In this particular report, we draw primarily on our Q4 2015 wave of research among 51,087 adults.

Respondents complete an online questionnaire that uses stratified sampling techniques to ensure that they are representative of the internet population aged 16 to 64 in each country (with correct proportions in terms of gender, age and educational attainment).

**Notes on Methodology**

**GWI’s Usage Definitions**

We measure three forms of engagement with most social platforms, defined as follows:

- **Membership/Account Ownership** - those who say they have an account on a social network
- **Visitation** - those who say they have visited the network in question in the last month, regardless of whether or not they have an account on the service
- **Active Usage** - those who have an account and say they have actively used or contributed to the service in the last month

These definitions are consistent across all of the platforms we track and thus allow accurate comparisons between networks. In contrast, self-published figures from social networks tend to use a wide and competing range of factors, but would typically utilize ‘Visitation’ as a definition of ‘Active Usage’.

**China**

In addition to using local networks, it’s clear that large numbers of internet users in China are connecting to major global platforms such as Facebook via VPNs, Proxy Servers and other tools. However, due to the sheer scale of the Chinese market, its high number of local social networks and the official restrictions it places on global platforms such as Facebook and Twitter, **China is excluded from most of the global charts featured in this report which track specific/named platforms** (see the base of each one for confirmation).
Engagement with Social Networking

- 92% of online adults have an account on at least one social media site, with 78% actively using one.

- People are most likely to use social media in order to keep up with friends (44%) or to fill time (39%).

- The average internet user spends 1 hr 49 mins per day on social networks, up from 1 hr 36 mins in 2012. By demographics, it’s younger and lower income groups who devote the most time to networking.

- Across 28 of the 31 markets where trended data from 2012 is available, daily time spent social networking has increased. Fast-growth markets spend the longest time on this activity, whereas mature markets in North America and Europe lag behind.
The average digital consumer now has close to 7 social media accounts and engages with 3.50 of them. In both instances, these figures have roughly doubled since 2012.

Facebookers are now active on an average of 5 networks, compared to 2.6 back in the first half of 2012.

A striking 85% of online adults globally have an account on at least one of Facebook’s four services, with this figure passing 90% among 16-24s and approaching the 100% mark in countries like Mexico, Vietnam and Indonesia.

PCs/laptops remain the most popular devices for most social activities, but mobiles continue to close the gap and are near to reaching parity for instant messaging.
Global, Facebook is the top network for membership (81%) and active usage (47%). However, YouTube moves to pole position for visitation (85%) – a trend which holds true across 21 of the 33 markets tracked, as well as in all age groups.

Facebook’s active users log in to the site more frequently than their counterparts on any other network – with an impressive 55% saying they do this more than once a day.

Year-on-year, Instagram has retained its title as the fastest growing network overall. Facebook and YouTube have also seen notable rises in active usage.

Instagram has now edged ahead of Twitter for visitation rates in 8 of the 33 countries surveyed. That it has also taken the lead among the key 16–24 group marks a particularly important development.

Tumblr, Instagram and Vine have the youngest audiences, with 37–39% of their respective active users coming from the 16–24 group. Facebook and LinkedIn have the oldest audiences.

---

**Question:**

- **Membership:** On which of the following services do you have an account?
- **Visitation:** Which of the following sites/applications have you visited in the past month via your PC/Laptop, Mobile or Tablet?
- **Active Usage:** Which of the following services have you used or contributed to in the past month using any type of device?

**Source:** GlobalWebIndex Q4 2015

**Base:** Internet Users aged 16–64, exc. China

---

*NOTE: Messaging Services such as WhatsApp, Messenger, Snapchat and WeChat are included in the Apps section*

---

Facebook is the most popular social networking app globally, with almost 60% of online adults using it. YouTube is close behind and also scores above 50% among the key 16-24 demographic. Instagram is neck-and-neck with Twitter overall, but pulls ahead significantly among 16-24s.

Facebook is top of the pile once again when we look at messaging apps – where Messenger (36%) and WhatsApp (34%) are the leading services. However, WeChat, BBM, LINE and Kakao Talk can all claim victories in certain markets.

Teen usage of Snapchat continues to significantly outpace usage among all adults, with close to 50% of 16-19s in places like the Netherlands, Canada, Sweden and the UK now being Snapchatters.

Of the messaging apps, Snapchat has the youngest age profile; 58% of users are 16-24. WeChat and Facebook Messenger also boast young audiences, whereas users on Viber, Skype and WhatsApp have broader age profiles.
Social Commerce and Brand Engagement

- More than three quarters of users on all of the major platforms say they purchase products online, but only 10-20% say they are currently interested in using a “buy” button. WeChat and Vine users are the most enthusiastic.

- Almost a third say they follow their favorite brands on social media, significantly outscoring options like actors (1 in 4) or vloggers (1 in 10).

- Clicking the “like” button is the top behavior on Facebook, whereas reading a news story tops the table for Twitter. As expected, messaging is the top action on Snapchat but 3 in 10 are engaging with Stories.

- Over 50% of Facebookers say they watch videos on the service, as do almost a third of Twitter users.

**TOP 10 BEHAVIORS ON FACEBOOK**

% of Active Users who did the following last month

- Clicked the like button
- Watched a video
- Messaged a friend on a 1-to-1 basis
- Read an article
- Read a news story
- Commented on a friend’s photo or video
- Logged in to see what is happening without posting/commenting on anything myself
- Commented on a friend’s profile status
- Uploaded and shared my own photos
- Updated my profile status / posted a comment about what I’m doing

**Question:** Thinking about when you use Facebook, can you please tell us if you have done any of the following within the last month?

**Source:** GlobalWebIndex Q4 2015

**Base:** Facebook Active Users aged 16-64, exc. China
